Summary

- I have more than 4 years of experience with Web Developer Position and mostly focus on PHP Language. Also has basic experience with React/React Native, Vue.js and Flutter.
- My next goal is to be a Full Stack Developer so I hope my next challenge can work as a Front End Position
- I want to work in an environment which I can improve my English and communication skills.
- I would like to have the opportunity to try in team's training & management in order to be a leader in the future.

Work experience

Web Developer

June 2021 - Present

JV-IT TECHS

Tsukuru Website Project

A website application that allows users create campaign and publish this to customers buy products through the settings in this campaign.

- Develop new features in a way that is later maintainable
- Maintain and clean code for available features or bugs
- Integrate API of Third Party based on requirement (Yappli, Paidy ...)
- Main driver of important features related to Send Notifications and Payments
- Carefully test my ticket before giving it to QC
- Report AWS system to client every week

- Research and apply the necessary technologies for the project (Restful API, Swagger API

Document, ...)

- Balancing Admin Dashboard and API development related tasks
- Training & Support for newbies same level

Tech stack: PHP, Laravel Framework, MySQL

Notable Personal Works

Ananas Website

Jan 2019 - Dec 2020

Ananas

This website is an e-commerce platform that allows users to openly buy shoes. And this is also my first freelance project, I have learned a lot not only about programming skills but also having a sales mindset.

- Get requests directly from client (CEO's Ananas)
- Communicate directly with client to come up with UI/UX, as well as the best solutions
- Develop Theme and Plugins for Wordpress Website
- Integrate API of Third Party based on requirement (OnePay, Momo, GHN ...)

Blue Eyes Mobile Application

Feb 2019 - Present

Blue Eyes

Blue Eyes is a non-profit application that I co-founded with 2 of my closest university friends, after seeing the needs of a central platform to host missing person profiles posts. The application is a social platform for public users to create and manage their missing person profile post. The application selectively matches and notifies the user if there is another missing profile seems to match the identity of the person they're looking for.

Mất Biết Facebook page

- Define the plan of the application, prioritize development tickets on Atlassian Jira Cloud and Confluence platform.
- Responsible for the Mobile Application
- Refer to the UI of related Apps to build up the UI for the current app
- Support another friend to manage the Facebook page and create content

Tech stack: Expo, React Native, Recoil, React Query, Firebase

Education

HCMC University of Technology and Education

2013 - 2017

HCMUTE

Bachelor of Information Technology
